

# Forest Kobayashi

---

CONTACT INFORMATION	Department of Mathematics The University of British Columbia Room 121, 1984 Mathematics Road Vancouver, BC Canada V6T 1Z2	Cell: +1 (907) 723-0730 Email: <a href="mailto:fkobayashi@hmc.edu">fkobayashi@hmc.edu</a> Github: <a href="https://github.com/redpanda1234">redpanda1234</a> <a href="https://www.bedmathandbeyond.xyz">https://www.bedmathandbeyond.xyz</a> He/him/his
CITIZENSHIP	USA (Alaska)	
LANGUAGES	English (native), Mandarin Chinese (conversational), Japanese (intermediate)	
RESEARCH INTERESTS	Optimization problems in stochastic/statistical contexts; Calculus of variations; Optimal transport; Mathematical theory of machine learning; Computational methods	
EDUCATION	<b>University of British Columbia</b> , Vancouver, British Columbia. Ph.D. in Mathematics (2020-2025). Advisor: Young-Heon Kim.  <b>Harvey Mudd College</b> , Claremont, California. B.S. in Mathematics (2016-2020). High Distinction; Honors in Mathematics. Thesis: <i>Where the Wild Knots Are</i> . Advisor: Francis Su <b>Secondary concentration:</b> Art.	
OTHER AFFILIATIONS	<b>Upcoming:</b> <ul style="list-style-type: none"><li>(April–May 2025) Visiting Graduate Student, <i>Université Paris-Saclay + Université Paris-Dauphine</i>, PARMA + MOKAPLAN groups.</li></ul> <b>Past:</b> <ul style="list-style-type: none"><li>(Summer 2019) Research Assistant, <i>Harvey Mudd College</i>, Knot Theory.</li><li>(Summer 2018) Research Intern, <i>UnifyID</i>, Machine Learning + Data Science.</li><li>(Summer 2017) Research Assistant, <i>Harvey Mudd College</i>, CS Education.</li><li>(Summer 2015) Lab Assistant, <i>University of Hawai'i Mānoa</i>, Phylogenetics.</li></ul>	
PREPRINTS AND PUBLICATIONS ( <a href="#">LINK</a> )	<ol style="list-style-type: none"><li>[1] F. Kobayashi, J. Hayase, and Y.-H. HONORS, AWARDS,  
AND PRIZES

**Graduate:**

- (2020-2024) *UBC Four Year Doctoral Fellowship*.
- (Declined for PhD studies in Canada) *NSF Graduate Research Fellowship*.

**Undergraduate:**

- (2020) *The Greever Research Prize*, Harvey Mudd College.
- (2020) *Outstanding Poster*, JMM 2020.
- (2019-2020) *Giovanni Borrelli Mathematics Fellowship*, Harvey Mudd College.
- (2019) *Best Poster*, Claremont Center for the Mathematical Sciences.
- (2019) *First Place Team*. Google Tech Challenge Orange County (regional inter-collegiate puzzlehunt and speed-coding competition).
- (2016-2020) *Harvey S. Mudd Merit Award*.

---

PROGRAMMING  
SKILLS

**Programming Languages:** experienced with **Julia**, **Python**; working knowledge in **bash**, **zsh**; prior experience with **Maple**, **Rust**, **Mathematica**, **MATLAB**, **SWI-Prolog**, **R**, and **Haskell**.

**Software & Libraries:** expert in **TikZ**; experienced with **L<sup>A</sup>T<sub>E</sub>X**, **Arch Linux**, **git**, **NumPy**, **Emacs**, **jupyter**, various **Julia** libraries; working knowledge in **selenium**, **Vim**, **matplotlib**, **pandas**

**Selected Programming Projects:**

- **SobolevPrincipalCurves.jl**: Joint work with Jonathan Hayase. A fast **Julia** implementation of our algorithm from [1] with some improvements/generalizations that will be detailed in a forthcoming work.
- Contributor to **Plom**, a free-and-open-source alternative to crowdmark/gradescope/speedgrader alternative that is in ongoing development at UBC. Among other things, I created an interface between **Plom** and **Canvas** that enables pulling submissions directly from **Canvas** into **Plom**, as well as subsequent push-back of graded work.
- **linear-presentation**: Joint work with Jonathan Hayase. A **Python** program for converting signed Gauss codes into knot diagrams in which all crossings are colinear. Works for both virtual and classical knots. Algorithm abstracts the strand-routing process as pushing symbols between two stacks, bringing runtime down to  $O(n)$  (where  $n$  is the length of the desired output diagram). Thus the performance is provably optimal up to a constant.
- **birack-lib**: A **Python** package for fast enumeration of the birack-flavored knot invariants we introduced in [3]. On certain inputs, improved runtime performance relative to previous methods by 6 orders of magnitude. Also includes some **Julia** scripts to search for infinite families of such invariants embedded into polynomial rings.
- **svg-to-tikz**: A lightweight transpiler for converting **.svg** images (e.g., Inkscape drawings) into **TikZ** code.
- **Conway-k-regular**: a **Python** implementation of Conway's game of life on a non-uniform tiling of convex polygons.
- **barnes-rust**: A **Rust**-implemented Barnes-Hut  $n$ -body simulator.

## TEACHING

### Teaching:

- (Upcoming; Spring 2025) Calculus, small class instructor
- (Fall 2021 – Spring 2023) Differential Calculus, workshop instructor

### Grading + TAing:

- (Fall 2023 – Fall 2024) Intro Calculus Piazza TA
- (Fall 2020 – Spring 2021) Linear Programming TA
- (Spring 2019) Topology TA (Inquiry-Based Learning)
- (Fall 2017) Discrete Mathematics
- (Spring 2017) Intro to Computer Science

### Other TAing:

- (Spring 2021 – present) **Plom** TA. I run logistics as well as the scanning/grading software for large exams in the UBC Math Department (plus a few in the Biology department). Designed a new workflow that facilitated full ingestion of Math 100/101 exams ( $\approx 180$  reams of paper) in just 18 hours, roughly a  $2\times$  speedup.
- 

## UNDERGRADS MENTORED

- Lucas O'Brien (Summer 2024; [5])
- 

## OUTREACH

- (Summer 2020) CyberMath Tutor
    - Tutored a group of 4 students in math concepts  $2\times$  per week in 3 hour sessions.
  - (Spring 2019) Gateway to Exploring Mathematical Sciences Volunteer
    - TAed a workshop introducing 8-10<sup>th</sup> grade students to concepts in Graph Theory.
- 

## OTHER

### Music:

- $>22$  years of Violin experience, including 6 years of chamber music and 4 years of orchestra.

### Art:

- Various Photography gigs
- Independent study with **Ken Fandell**.
- Delivered a  $\approx 10$  min talk to the trustees of Harvey Mudd College about Art in the student experience (Spring 2019)

### Misc:

- Ordained to officiate weddings in the state of Washington. One happily-married couple so far!
-
